- E. SESSION SUMMARY:

The target is a place that has the ideas of "seasonal use" and "recreational" associated with it. There are groups of people lounging around. This place has the terms "investment" and "politics" associated with it. There is a spinning motion as well as one associated with a bubbling sensation. Yellow, red, white and green colors predominate with "vibrating" associated with some or all of them. There are green rectangles and "similar objects".

There is the concept of height and a "mountain-like" freshness. There is a small shed or arbor and an L-shaped hollow tube. The view is panoramic (but hell, aren't all of these targets panoramic?!). There is rhythmic music reminiscent of a drum or drums beating in time. There are numerous discordant images with jagged edges and changing shades.
